Password setting

Your password must have 8 to 30 single-byte characters. Use at least one English letter (alphabetic), one Arabic numeral (0, 1, 2...), and one symbol (choose from + - * / = . , ; : ' @ ! # \$ % ? | ~ ^ () [] { }). The English letters are case-sensitive.

Password (Required)

Enter it again for confirmation.

■Note

If you use the same password for multiple websites and the password is leaked from one website, there is the risk that unauthorized access may be made to other websites you use and the cyber security threats may increase.

If someone misuses your password, there is also the possibility that your personal information may be leaked and products may be purchased fraudulently. Therefore, it is recommended to set different passwords to different websites.
